

A quilt that fits.

Finished-size references for thoughtful planning.
Choose the coverage you want, then measure your space.

01 / CHOOSE A STARTING SIZE

QUILT	INCHES	CENTIMETERS*
Baby / Crib	36 x 52	91.4 x 132.1
Throw / Lap	52 x 60	132.1 x 152.4
Twin	70 x 90	177.8 x 228.6
Full / Double	84 x 90	213.4 x 228.6
Queen	90 x 100	228.6 x 254.0
King	108 x 100	274.3 x 254.0

* Centimeters rounded to one decimal. Dimensions are width x length.

These are approximate finished quilt sizes, not mattress measurements or universal standards. They match YardageLab's calculator references. Adjust for mattress depth, desired drop, pillow coverage and the pattern you are making.

02 / MAKE IT YOURS

Finished width = mattress width + twice the side drop
Finished length = mattress length + foot drop + pillow allowance

Measure your bed rather than relying on its size name. Backing, batting and cutting allowances are additional. For babies, use this as a project-size reference only, not guidance on sleep bedding.

From idea to cutting table.

A quiet place to plan the details before the first cut.

PROJECT

DATE / MAKER

01 / FINISHED QUILT

Width

Length

Block size / grid

Sashing / borders

UNITS

☐ inches

☐ cm

Use finished block dimensions.
Add seam allowances separately
when preparing cutting sizes.

02 / FABRIC & FINISHING

Usable fabric width

Backing overhang / side

Seam allowance

Binding strip width

☐ Directional print

☐ Prewash / shrinkage

☐ Pattern repeat

☐ Quilter requirements checked

03 / PURCHASE NOTES

Calculate backing and binding separately at yardagelab.me/quilting/.
Keep exact requirements separate from purchase rounding and any extra buffer.
